Portfolio: bruc3wang.github.io/rui-wang-resume/en

Ipsos Research Executive combining multi-country quantitative research, user insight and brand tracking with practical AI-assisted workflows for analysis, validation and recurring research delivery.

## Professional Experience

### Ipsos | Research Executive

Mar 2026 - Present

Clients: ByteDance and Lenovo

- **Multi-country tracking:** Lead study coordination and analytical delivery for a multi-country content-experience tracker. Use relative weight, correlation and cross-wave analyses to identify factors associated with satisfaction, producing cross-market reporting and research recommendations.
- **Brand performance:** Deliver multi-wave data integration and reporting across audience segments and product categories. Align metrics and comparison criteria, reconcile data-to-report discrepancies and preserve valid historical results to support brand and competitor assessment.
- **U.S. user research:** Independently manage fieldwork, audience segmentation and analysis for a U.S. content study; compare preferences, habits and audience overlap to inform positioning.
- **Search research:** Contribute to multi-country search tracking through segmentation, cross-tabs and trend comparisons, examining platform awareness, search contexts and habits.
- **User needs research:** Combine interviews and surveys in international fieldwork and business-user profiling to examine product needs and purchasing decisions; coordinate across languages.
- **AI-assisted analysis:** Define methods, sample criteria and update scope. Use Codex for batch calculations, independent recalculation and cross-wave checks; link source data to tables, charts and narrative to update recurring reports and trace discrepancies.
- **Reusable research tools:** Build reusable research workflows, validation guides and Codex Skills. Tools are used in formal project delivery and adopted by colleagues.

### Meritco Services | Data Analyst Intern

May 2024 - Aug 2024

- **Health product upgrades:** Combined transaction, competitor and user data to compare pack sizes, bundles and prices; linked purchasing needs to product-mix and upgrade recommendations.
- **Pet-food product development:** Analyzed leading brands' products and channels, using industry interviews to develop competitive and brand-case analyses for positioning and launch preparation.

## Education

### University of Toronto | Honours Bachelor of Science

Sep 2021 - Jun 2025

Statistics and Economics Majors | Computer Science Minor

## Skills

**Research:** Quantitative and qualitative research, audience segmentation, relative weight analysis, cross-market and cross-wave comparisons
**Tools:** Excel, SQL, R, Codex; SQLite databases, source traceability, query and comparison prototypes
**Personal practice:** AI-assisted websites, motion and video; 3D exploration with Blender and Three.js
**Languages:** English (TOEFL 110) | Mandarin Chinese (Native)
